TimeLog rep	port for CS52	25 Labs	
Student:	Naimish Viradia		
Course:	ASD		
Oourse.	AOD		
Date	Time start	Hours	Activity
Date	Time start	1 louis	Design UML for banking and credit card
8/6/2014	2:00:00 PM	3	application
8/7/2014	2:00:00 PM	3.5	Designed a common framework from bank and credit card UML, and used the framework to create banking and credit card application.
8/8/2014	2:00:00 PM	4	Reviewed the design from the earlier day to create more extensibale, moduler UMLs for the common framework, banking application and credit card application.
8/10/2014	2:00:00 PM	4	Refined the earlier class diagram and introduce patterns in UML diagram so modules can be decoupled, and from class diagram created several sequence diagrams for use cases of each application.
8/11/2014	1:00:00 PM	9	- Design UML diagram common framework for gui in our application - Starts implemented common gui framework with frame and common dialog for transaction and account creation - And concreate classes for Bank application derived from common framework
8/12/2014	11:00:00 AM	12	- Refactored the developed code - Implementes Template pattern in GUI framework - Introduce MVC inside GUI frame work where controller is an Strategy for each use cases in Bank application Where Strategy is in common framework and Template for some method overriden in concreate classes Implement usecase generate report for each account with its transaction details and report for account manager which generate report for all account Complete Bank application with full functionality Changes to UML diagrams Changes to sequence diagram.
8/13/2014	8:00:00 AM	4	 Provided sorting in table Restructure, cleanup and update UML diagrams and sequence diagram
8/13//2014	12:00:00 AM	2.5	- Implement Credit card application with full functionality from common framework

	Total Hours:	42

Result
- 10 0 0111
Two UML pdf files with designs for banking and credit card applications.
Three UML files for common framework, bank and credit card.
Three UML files for common framework, bank and credit card.
 Common framework class diagram Banking application class diagram Credit card application class diagram Sequence diagrams (create savings account, create a credit card account, withdraw and deposit money to bank and credit card accounts) Status report
 - UML diagram with common gui framework - The basic code for common gui and bank application
- A running banking application - UML diagrams - Sequence diagram
A running banking applicationUML diagramsSequence diagram
- A running Credit card application
